

User engagements log with each page movement/refresh within the LMS. If a browser window is just closed, the LMS doesn't get another "hit" and there is no further engagement.

From the **Admin** tab, click on **Reports**, and then **User Engagements**

The user engagement reports shows actual web addresses visited by the user.

Home page visits and accessing the Mail center are not logged.

/courses – My Courses page

/grades/my-certificates - Scores page

/admin/user/switch/##### – this means an admin user logged into another account using the switch user function

/courses/course/##### - Main course page

/courses/lessons/##### - This is the main lesson page for a course

/courses/lessons/#####/preview/##### – opening the lesson page with the first piece of lesson content

/courses/lessons/#####/preview/#####/##### - opening a lesson page with more than one piece of content (another set of #s is appended)

/add-lesson-progress/#####/##### - indicates marking the item complete or clicking the next button to proceed

/courses/tests/#####/student-test - test launch page

/courses/tests/#####/student-test-questions/#####/0/0/1 - taking test

/courses/tests/#####/student-test-score/#####/0/0/1/FinishTest - test submission page

/courses/tests/#####/review-test/#####/0/0/1 - test review page

/courses/course-complete/##### - course completion page

Note: If you append any of the “/courses/lessons/#####” etc to <https://v9.edvance360.com>, you can go to the actual page visited.

Admins trying to determine how much time a student spent in a video should use the SCORM Report - available from Reports within each course or via [Admin Course Reports](#) (for reporting on multiple courses)
